Expense Budget Summary Description

The School Department allocates its expense budget in various programmatic categories as outlined in the FY 2020 Expense Budget Detail Table. Each expense budget line has a budget manager assigned who is responsible for the oversight and management of the budget. The School Department annually identifies new expenses that fall into three categories; legally mandated, enrollment, and program improvements when determining potential increases to the expense budget.

Additionally, program/building-based expense budgets are adjusted for enrollment changes using a per pupil expenditure rate, which is also then adjusted by the Consumer Price Index (CPI). Non-program and District-wide focused budgets are only adjusted by the Consumer Price Index (CPI) to account for inflationary factors. The FY 2020 expense per-pupil budget is assembled using the October 1, 2018 enrollment data reported to the state.

A table is inserted below highlighting the enrollment data used to calculate the FY 2020 expense budgets subject to per-pupil expenditure adjustments.

FY 2020 Superintendent and School Committee Recommended Budget

Based on the enrollment, CPI adjustments, and new expense requests a summary is provided below illustrating a two-year comparison of the expense budgets, by program and level, in detail. The final Expense Budget Detail table gives a five-year comparison of actual (FY 2016 to FY 2018) and Budget (FY 2019 to FY 2020) by program.

Per-Pupil and Consumer Price Index (CPI) Expense Budget Adjustments

Below is a detailed listing of the per-pupil and CPI adjustments that were calculated for various program lines in the FY 2020 budget that were included in the summary above. Full detail of the expense changes are described in the Recommended Budget section.
